*I was **BLIND**...and now I **SEE!***

By Bob Livingston

Well, I wasn't blind but I was far more blind than I thought.

If you haven't already had a cataract operation with lens replacement, do I have something for you!

I went to Hattiesburg, Mississippi to the Southern Eye Clinic to see Dr. Lynn McMahan for removal of cataracts. They did intensive testing and offered me a procedure using AcrySof ReSTOR® lens, which is a revolutionary multifocal lens that improves vision. You won't have new eyes, but you will have restored sight. Talk about a panacea-or should I call it a miracle!

I never could imagine anybody or any doctor even coming close to my eyes. But when they told me that I had the option of the multifocal lens which improves (restores) vision in a full range of

distances, from near to far, I said, "Yes" immediately.

Cataracts are only part of the story. I am talking about one big dimension beyond a cataract removal operation. This is a miracle of totally new (restored) eyesight. Cataract removal does correct your vision wonderfully. My wife has had 20/20 vision for five years, since Dr. McMahan removed her cataracts and implanted intraocular lens. She has renewed eyesight, but still needs reading glasses because the lens which corrects for reading was not available five years ago. An intraocular lens is the replacement lens that is surgically implanted in the eye to replace the existing clouded lens during cataract surgery.

Well how did it go? I made two trips to the Clinic, one week apart.

Dr. McMahan operated on one eye for a total of 11 minutes by my wife's timing, and a week later for 14 minutes on the second eye. I never felt a thing and almost nothing afterward. No anesthesia, just local drops. No pain medication was needed nor prescribed!

In my opinion, Dr. McMahan is a world-class eye surgeon. Wherever you are, he is worth the trip to Hattiesburg. His staff provides perfect comfort and assurance. I am so excited! And I'm still reaching for my glasses that I haven't needed since my sight miracle. My mind doesn't yet believe that I have perfect vision!

Dr. McMahan's office can be reached for an appointment at **1-800-821-5605** or you can visit his website at:
